

4-port network cable connector panel with fiber optic cable

Article Overview

A 4-port fiber optic patch panel provides compact, rack-mountable connectivity for singlemode or multimode fiber networks, supporting SC, LC, or MPO connectors with preterminated pigtailed or modular adapter packs.

Overview

A 4-port fiber optic panel is typically a 1U rack-mounted unit designed to terminate and manage fiber optic cables efficiently. These panels are ideal for FTTX projects, data centers, CATV, and enterprise networks. They provide a structured solution for connecting fiber cables, protecting terminations, and simplifying network management .

Key Features

- **Port Configuration:** 4 ports, often equipped with SC/UPC adapters and preterminated G657A1 LSZH pigtailed for singlemode fiber .
- **Rack Mounting:** Standard 19-inch 1U form factor, sometimes available in sliding or fixed configurations for easy access .
- **Fiber Compatibility:** Supports single fiber, ribbon fiber, singlemode, or multimode cables. Some panels also accommodate MPO/MTP connectors for high-density applications .
- **Construction:** Made from cold-rolled steel with plastic components for durability, compact design, and space-saving installation
