

African Mesh Cable Tray Specifications

Article Overview

African mesh cable trays are typically made from galvanized steel or stainless steel, offering corrosion resistance, durability, and flexibility for industrial, commercial, and data center applications.

Materials and Finishes

Wire mesh cable trays in Africa are commonly manufactured from galvanized steel, stainless steel (SS 304/316), or aluminum, providing high corrosion resistance and durability for both indoor and outdoor environments . Finishes include hot-dip galvanized (HDG), pre-galvanized, powder-coated, and stainless steel, ensuring suitability for harsh industrial conditions, food processing, pharmaceutical, and marine applications .

Dimensions and Load Capacity

Mesh cable trays are available in a wide range of widths from 40 mm to 1000 mm, with heights typically ranging from 25 mm to 75 mm, depending on the manufacturer and load requirements . These trays are designed to support medium to heavy loads, with thorough testing for load capacity, corrosion resistance, and performance reliability . Custom sizes can also be fabricated to meet specific project requirements .

Types and Accessories

African manufacturers provide various types of mesh cable trays, including:...
