

Brazilian AI Computing Server

Overview

Rising demand from companies seeking to accelerate artificial intelligence projects in Brazil is driving local production of high-performance computers. On Tuesday (20), Dell Technologies began manufacturing its first AI server in Brazil at the company's plant in Hortolândia, São Paulo. According. ByteDance is pouring \$39 billion into a single Brazilian data center. When it's done, it will be the TikTok owner's largest data. International architecture studio Hyphen has released plans for a data centre in Rio de Janeiro state with 10 plant-covered buildings and parkscapes and has claimed it will be "one of the world's first sustainable AI districts". ByteDance has chosen a remote stretch of Brazil's Ceara state for what will become its largest data centre complex anywhere outside China, a staged build the. Brazil will launch Scala AI City with investments in data centers. Key advantages include the energy factor and distance from conflict zones.
