

# Bus joint protective cover

## Article Overview

Bus joint protective covers are insulating shrouds designed to protect and insulate busbar connections, preventing accidental contact and flashover in electrical systems.

### Overview

Bus joint protective covers, also known as busbar connection shrouds, bus boots, or insulation shrouds, are used to cover joints between busbars or conductors in low and medium voltage switchgear, substations, and other electrical equipment. They provide electrical insulation, safety, and protection against flashover, while also helping to reduce air clearance requirements and allow more compact panel designs .

### Materials and Construction

- PVC (Polyvinyl Chloride): Commonly used for injection-molded joint covers, offering good insulation and durability. Available in colors like black, red, white, and blue .
- Radiation cross-linked compounds: Provide high resistance to tracking and arcing, suitable for higher voltage applications up to 36 kV .
- Polyolefin heat-shrink tubing: Used for insulating busbar systems, offering non-tracking properties and easy installation .

### Voltage Ratings

- Low voltage covers: Suitable for applications up to 1 kV.
- Medium voltage covers: Designed for use up to 36 kV, with excellent outdoor and...
