

Cable tray cover plate size specifications table

Article Overview

Cable tray cover plates are sized to match the tray's nominal width and depth, typically ranging from 6 to 48 inches wide and 2 to 6 inches deep, depending on tray type and application.

Standard Sizing

Cable tray covers are designed to fit the nominal inside width and depth of the tray. Common widths for ladder or pan trays include 6, 9, 12, 18, 24, 30, 36, 42, and 48 inches, while typical depths range from 2 to 6 inches for standard trays, with variations for heavy-duty or high-capacity applications. The cover plate should fully span the tray to protect cables from dust, debris, and accidental contact, while allowing for proper heat dissipation.

Types of Covers

- Solid Covers: Provide maximum protection against dust, moisture, and physical damage. Ideal for industrial or outdoor environments.
- Perforated or Ventilated Covers: Allow airflow to reduce heat buildup in high-current installations. Perforation patterns may vary depending on tray size and manufacturer.

Selection Considerations

- Tray Width and Depth: Always select a cover that matches the tray's nominal insi...
