

Can a router use China Unicom fiber optic cable

Article Overview

You cannot plug a China Unicom fiber optic cable directly into a standard router; it must first connect to an Optical Network Terminal (ONT), which then links to your router via Ethernet.

Why an ONT is Required

Fiber optic cables transmit data as pulses of light, which standard routers cannot interpret directly because they only handle electrical signals over Ethernet. The Optical Network Terminal (ONT), usually provided by China Unicom, converts the optical signal into a standard Ethernet signal that your router can use. The ONT acts as the bridge between the fiber network and your home network.

Step-by-Step Connection Process

- **Locate the Fiber Wall Outlet:** This is where the China Unicom fiber line enters your home.
- **Connect the Fiber Cable to the ONT:** Insert the fiber optic cable into the ONT's optical port. Handle the connector carefully to avoid dirt or damage.
- **Power On the ONT:** Use the provided power adapter and wait for the status lights to stabilize, which may take a few minutes.
- **Link the ONT to Your Router:** Use a high-quality Ethernet cable (Cat6a or higher recommended) to connect the ONT's LAN/Ethernet port to the WAN port on your router.
- **Power On the Router:** Wait for the router's indicator lights to confirm a successful...
