

Composite Cable Tray Models and Specifications

Article Overview

Composite cable trays, typically made from FRP/GRP, offer lightweight, corrosion-resistant, and fire-retardant solutions for industrial and commercial cable management.

Types of Composite Cable Trays

1. Ladder Type Cable Tray

- Constructed with two side rails connected by transverse rungs.
- Open design allows excellent ventilation and heat dissipation.
- Suitable for power cables, large-diameter control cables, and industrial plants.
- Available in light, medium, and heavy-duty load classes with variable rung spacing .

2. Trough or Channel Cable Tray

- Features a bottom plate with side rails, providing moderate protection while allowing some ventilation.
- Ideal for control, communication, and instrumentation cables.
- Can be supplied with optional covers for outdoor or dusty environments .

3. Solid Bottom Cable Tray

- Fully enclosed bottom and continuous side walls.
- Offers maximum protection against dust, liquids, and mechanical damage.
- Commonly used in sensitive or harsh environments .

4. Cushioned or Specialized Designs

- Some manufacturers provide cushioned trays for vibration-sensitive installations....
