

Connect the network cable from the router to the fiber optic transceiver

Overview

Ethernet cable: To link the ONT/modem to the router. Locate the fiber optic wall outlet: This is where your ISP's fiber line enters your home. This comprehensive guide combines industry standards with field-tested practices to ensure you achieve a rock-solid. To connect your fiber optic cable to a router, ensure you have the following:

Fiber optic modem (ONT): Most fiber connections require an Optical Network Terminal (ONT), provided by your ISP. Compatible router: Verify that your router supports fiber optic input (look for an SFP or WAN port labeled). The fiber optic cable does not plug directly into a standard home router because the signal type must be translated. The fiber line terminates at the Optical Network Terminal (ONT), which is typically supplied and installed by the internet service provider. You don't want to dig around mid-job for something small but essential.
