

# Customization Process for Anti-Calling LX5 Connectors for Hospitals

## Overview

Work directly with our experienced Product Engineers to create a customized connector, or use our online Build-A-Part™ tool to configure one of our standard designs to meet your application. • Latched push-pull connector • Automatic metal shutter in connector and adapter as dust and laser beam protection • Small Form Factor connector for high packing density. 2 connections in SC shape adapter • One-piece design for easy and quick termination • Short rigid length of pigtail-connector • Today, packing density is more important than ever. 5-connector, based on the proven 1.25 mm ferrule technology, is the only standardized small form factor connector combining high packing density, reliability, high performance and safety due to its automatic metal shutter. Patch fields with. Today's patch fields with high packing densities do not only require a compact design of single components, but also a stable optical transmission performance. Unlock the full potential of the Metropolitan Area Network (MAN) with our in-depth guide. Learn. That is why Amphenol developed the 955 series MPO adapter family. Made in both die-cast and industry compliant thermoplastics, the MPO adapter is precision manufactured to insure intermateability with industry standard assemblies and connectors.
