

Does the post office have fiber optic cable now

Article Overview

Yes, the Post Office offers fiber optic broadband services in the UK, delivered via the TalkTalk infrastructure.

The Post Office provides several broadband options, including fast fiber optic broadband and superfast high-end fiber packages, suitable for streaming, social media, and multiple devices simultaneously . These fiber services are part of their broadband offerings alongside standard copper-based connections, and they are available depending on your location. Customers can check availability using the Post Office broadband checker by entering their postcode .

Features of Post Office Fiber Broadband

- **Speed:** Fiber packages can reach speeds up to 76 Mbps with the 'Max' package, though actual speeds depend on proximity to the nearest telephone exchange .
- **Unlimited Usage:** There are no download or streaming limits, and no traffic management system, meaning speeds are maintained even during peak times .
- **Installation:** Broadband can be installed in as little as 10 days, with a free Wi-Fi router included in all packages .
- **Security and Extras:** Six months of F-Secure SAFE internet security is included, along with parental controls, anti-virus, and anti-spam features .
