

Dustproof rating standard for indoor electrical distribution boxes

Overview

IEC 60529 has been developed to rate and grade the resistance of enclosures of electric and electronic devices against the intrusion of dust and liquids. It also rates how easy it is for individuals to access the potentially hazardous parts within the enclosure. What Are Electrical Enclosure Standards?

Can IP and NEMA Ratings Be Converted?

Choosing an electrical enclosure is not only about size, material, or price. Our IP rating guide is written based on IEC 60529. Let's focus on the first digit, because that's. The International Electrotechnical Commission (IEC) standard 60529, "Degrees of protection provided by enclosures (IP Code)," provides a globally recognized classification system to quantify an enclosure's effectiveness against such ingress.
