

FTP Fiber Optic Switch

Overview

This switch provides two Ethernet 10/100/1000Base-T copper ports and eight SFP slots for fiber-optics. Various port sizes are available ranging from 4 up to 52 ports. We offer solutions that provide seamless transmission and conversion. 8 port Fiber Optic SFP switch allows you finish fiber connectivity that is with different bandwidth requirements conveniently and cost savings. A standard product features gigabit uplink speed, easy installation, high security, flexibility of selecting SFP modules, which gives ease of management. An Ethernet fiber switch is a networking device that enables data transmission over fiber optic cables rather than traditional copper cables. It is essential for high-speed networking, offering extended reach and bandwidth capabilities. 3af. □10Gb Super-Fast Fiber Switch□This 10 gigabit switch features 8 x 10G SFP+ ports and 160Gbps switching capacity, providing higher-speed connectivity for your devices and allowing you to easily upgrade your network to support the latest 10Gb standard.
