

Fiber Optic Distribution Box Hanging Pole

Article Overview

Pole-mounted fiber optic distribution boxes are designed for outdoor aerial installations, providing secure, weather-resistant housing for fiber splicing, splitting, and distribution.

Overview

A fiber optic distribution box serves as a termination and distribution point where feeder cables connect to drop cables in FTTx networks. Pole-mounted boxes are specifically engineered for utility poles, telecom poles, and street-level infrastructure, making them ideal for rural broadband, overhead FTTH deployments, and long-span feeder-drop transitions ().

Key Features

- **Material and Durability:** Typically made from high-strength engineering plastics such as PC+ABS, these boxes are moisture-proof, dustproof, UV-resistant, and anti-aging, ensuring long-term outdoor performance ().
- **Capacity:** Common models can accommodate 16 SC adapters, multiple 1:8 splitters, and a 16-core splicing tray, supporting both splicing and jumper management ().
- **Environmental Protection:** Pole-mounted boxes require high IP ratings (IP65–IP68) to withstand rain, UV exposure, and temperature fluctuations ().
- **Mechanical Reinforcement:** Aerial installations generate tensile loads; therefore, pole-mounted boxes include reinforced tension control and strength member anchoring to secure cables safely ()....
