

Fiber Optic Rapid Fusion Splice Equipment

Overview

Fusion splicers are essential for creating low-loss, high-performance fiber optic connections in telecom, FTTH, and data center applications. The best splicers offer core alignment, fast splice times, durable designs, and smart features like cloud syncing and automated. Thorlabs' Vytran® product family is designed for fusion splicing, optical fiber processing, and end face geometry inspection. Top-rated models. Optical Fiber Splicing has two methods: mechanical or fusion. The AFL CT60 Fiber Optic Cleaver is built for technicians who need repeatable, high-quality cleaves. With industry leading repeatability, your last splice will be as accurate as your first. In Japan, we hold Fiber optic training where participants can systematically acquire knowledge and skills necessary for using fusion splicer, tools, and performing splicing work.
