Whether you're streaming, gaming, or working from home. A modem (modulator-demodulator) is a device that connects your home or office to the internet by establishing a connection with your Internet Service Provider (ISP). Modems come in. The answer to What Do a Modem and Router Look Like?

can vary significantly, but generally, a modem is a rectangular box with coaxial cable and ethernet ports, while a router is often a similar box with multiple ethernet ports and visible antennas. Modern networking devices, namely modems and. Their Fios router connects to an Optical Network Terminal (or ONT), which is essentially the modem for fiber-optic internet. Their 5G gateways don't need any other hardware and simply plug into the wall. Routers come in a variety of shapes and sizes, ranging from small, unassuming boxes with antennas to rack-mounted units designed for enterprise environments; however, they all share the core purpose of directing network traffic. What Do Routers Look Like?
