

Fiber optic fusion splicer battery not charging

Overview

If your fusion splicer's battery isn't charging correctly, don't panic. There are a few things you can check before assuming the worst. The issue could be as simple as a faulty power cable, a loose connection, or a worn-out battery that needs replacing. Start by inspecting the charger, power. Before first use, it is recommended to fully charge the battery pack. Operating the. High splice loss occurs when the fusion between two fibres does not achieve proper core alignment, resulting in excessive optical signal attenuation. Your Optical Fiber Solutions Partner ®. If you use other batteries or battery chargers, it may possibly lead to smoke, electric shock, equipment inside the equipment can not be removed or bridged.
