

Fireproof cable tray specifications wholesale

Article Overview

Fireproof cable trays are engineered to support, organize, and protect electrical cables while maintaining structural integrity under fire conditions, available in wholesale from multiple manufacturers.

Materials and Construction

Fireproof cable trays are made from a variety of materials to ensure fire resistance and durability:

- Steel trays: Carbon steel or galvanized steel, often zinc-coated for corrosion resistance, providing high strength and non-combustibility .
- Aluminum trays: Lightweight, corrosion-resistant, and fire-resistant, suitable for industrial and commercial applications .
- Non-metallic trays: Resin and glass fiber composites, offering excellent fire resistance and chemical inertness .
- Intumescent-coated trays: Expand under heat to form an insulating char layer, enhancing fire protection .
- Open-grid designs: Interwoven metal wires promote ventilation and reduce heat buildup .

Fire Resistance and Standards
