

Fireproof cable trays and trays are custom-made

Article Overview

Fireproof cable trays can be tailored to your specific project needs, offering fire resistance, material options, and design flexibility for safe and reliable cable management.

Overview

Fireproof cable trays are designed to support, organize, and protect electrical and communication cables while minimizing fire risks. They are engineered to withstand high temperatures, resist flame propagation, and maintain structural integrity during fire exposure, ensuring operational continuity and occupant safety in industrial, commercial, and institutional buildings .

Materials and Fire Resistance

These trays are available in a variety of materials, each offering unique benefits:

- Steel trays: Carbon steel provides high strength and inherent fire resistance, often coated with zinc for corrosion protection .
- Aluminum trays: Lightweight with good fire resistance and excellent corrosion performance .
- Non-metallic trays: Made from resin and glass fibers, offering chemical inertness and fire resistance .
- Composite materials: Fire-rated PVC and fiberglass (FRP) trays provide corrosion r...
