

H3CSFP Optical Module Types

Overview

Huawei S series devices support optical modules of the following encapsulation types: CFP, QSFP+, QSFP28, XFP, SFP, eSFP, and SFP+. All optical modules are hot swappable. The SFP (Small Form-factor Pluggable) is a compact, hot-pluggable network interface module used to connect network devices (switches, routers, firewalls) to fiber optic or copper cables. H3C fiber network cables. subject to change without notice. All contents in this document, including statements, information, and recommendations, are believed to be accurate, but they are presented without warranty of any kind, express or implied. H3C shall not be liable for technical or editorial error or environmental protection. Optical modules are available in various types to meet diversified requirements. Answer first: single-mode and multimode SFP-family optics are not interchangeable categories: choose the exact host-supported module PID from speed, wavelength, lane design, connector, fiber type, reach, transmit and receive limits, loss and dispersion budget, temperature, software, and.
