

How many disks are in a 144-channel optical distribution box

Overview

This 144C modular ODF is composed of 12pcs pre-loaded 12C splicing and patching unit that includes FC/SC/ST/duplex LC compatible adaptors, pigtails and 12 core splice tray. Integrated design provides OSP cable fibers and pigtail splicing, patch-cord termination and storage. Each fusion module can be extracted separately, meeting the requirements of off frame or on frame operation. Application The application of such a system is in rooms where maximum flexibility is. FBWN-ODF-144-A 144 cores 4U ODF fiber optic are the backbone of your fiber optic network system. A Fiber Optic Patch Panels includes up to 12 duplex SC connectors, as well as an integrated IDC shroud with strain reliefs that are. The 144 Cores ODF Unit is a compact Optical Distribution Frame which combines both, the splicing- and patching segment in the same 3 height unit 19" Sub-Rack. 144 Cores ODF Unit is pre-assembled with couplings and pigtails and splice cassettes and Fiber Optic ODF has an integrated fiber guiding. The ORM 144 optical distribution box is designed for the placement of 144 optical connectors in both indoors and outdoors. We no longer actively offer this product.
