

How much does a meter of 1-core outdoor optical fiber cable cost

Article Overview

A 1-core outdoor optical fiber cable typically costs between \$0.40 and \$0.50 per meter, depending on specifications and purchase volume.

Price Range

For a single-core outdoor fiber cable, the cost generally falls around \$0.40 per meter for standard FTTH drop cables, while more specialized or ruggedized outdoor cables can reach \$0.50 per meter or slightly higher . Wholesale bulk purchases may reduce the price slightly, whereas retail or pre-terminated assemblies are more expensive .

Factors Affecting Cost

- **Cable Construction:** Outdoor cables often have PE jackets for UV resistance and weather protection. Armored or direct-burial cables increase costs by 20-50% .
- **Fiber Type:** Single-mode fiber (OS2) is commonly used for long-distance outdoor runs and is slightly cheaper than multimode fiber .
- **Environmental Rating:** Cables designed for harsh conditions, such as mining or industrial sites, can cost up to \$3 per meter, reflecting additional protective layers and materials .
- **Purchase Volume:** Buying in bulk reduces the per-meter cost, while small quantities or pre-terminated cables increase it .
