

How to adjust a TP-Link router using fiber optic cable

Overview

Connect Fiber ONT to WAN port of TP-Link router. Go to “-IPTV”, adjust VLAN to 10. Insert username and password given by 2Degree. Go to “-IPTV” . In this tutorial, we'll guide you step-by-step through simple and effective configuration of your TP Link fiber optic router. Setting up your TP-Link router for fiber optics may seem like a daunting task, but with the right steps, it can be quite easy. In this article, we'll show you how to set up. Visit your product's support page, select the correct hardware version for your device, and check either the Datasheet or the firmware section for the latest improvements added to your product. You will need to know your Internet service provider (ISP) connection type (Dynamic IP, PPPoE, or Static IP). Contact your ISP if you are unsure.
