

How to connect the fiber optic 86 panel

Article Overview

To connect a Type 86 fiber optic panel, route the fiber through the panel, secure it to the junction box, connect the fiber jumpers to the adapters, and ensure proper coiling and alignment for maintenance.

Step-by-Step Installation

1. Prepare the Junction Box and Panel

- Ensure the 86 mm wall junction box is installed and accessible.
- The Type 86 fiber optic panel is designed to fit standard 86 mm wall boxes and may have single or dual ports depending on your setup .
- 2. Route the Fiber Cables
 - Pass the optical fiber through the square cable hole on the panel bracket.
 - If the panel includes a power bracket, route the DC power line through the round cable hole .
- 3. Secure the Panel
 - Align the mounting pegs on the rear of the panel with the mounting arms on the bracket.
 - Slide the panel downwards to mount it securely.
 - Use screws to fix the panel and prevent it from dropping .
- 4. Connect Fiber Jumpers
 - Connect each fiber jumper to the corresponding port on the panel.
 - Ensure the connectors are clean and dry to avoid signal loss or damage .
 - Use SC or LC adapters depending on your fiber type; some panels support both .
- 5. Manage Excess Fiber
 - Coil any redundant fiber behind the panel to prevent bending or stress on the fibers .
 - Avoid sharp bends and excessive force to prevent fiber fracture.
- 6. Connect Netw...
