

How to peel open a single-core optical cable

Overview

FOS03 Fiber strippers remove the coating from the fiber optic cable to expose the glass fiber. 2 Corning Cable Systems ribbon interconnect cables are lightweight, flame retardant cables designed for high performance transmission of digital and analog signals in process. Goal is to open cable and expose the fibers for splicing or termination without harming them. We terminate fiber optic cable two ways - with connectors that can mate two fibers to create a temporary joint and/or connect the fiber to a piece of network gear or with splices which create a permanent joint between the two fibers. These terminations must be of the right style, installed in a.

① The connection environment should be dustproof, waterproof and shockproof.
