

How to turn off the power to the elevator distribution box

Overview

Shut off the power to the elevator at the main breaker box. Most breaker boxes allow you to selectively turn off power. Siemens Elevator Control Switch (ECS) is designed to interrupt incoming AC power upon receiving a signal from a Fire Alarm. A question generally asked is, "Will the emergency stop switch located in the elevator car or the stop switch in the pit area or on the elevator car top area shut off the power to the elevator?"

" The answer is NO. These switches open a circuit, but they do not disconnect power from the elevator, and. Our Power Module Switch is an all-in-one elevator disconnect switch available in configurations to meet virtually any single elevator shutdown and disconnect requirement. Easily selectively coordinated, this switch meets all of the applicable code requirements for the Elevator Code, Fire Alarm Code. el or LOP) to call the elevator to your floor. The Elevator Control Switch comes completely assembled for quick installation, eliminating the labor and time. The signal words "DANGER," "WARNING," "CAUTION" and "NOTICE" (along with their assigned symbol) throughout this manual indicate the degree of hazard the user may encounter. DANGER: Indicates a hazardous situation which, if not avoided, will result in death or serious injury.
