

# Huawei 4-Port PoE Switch

## Article Overview

Huawei 4-Port PoE switches provide reliable Power over Ethernet for small to medium networks, supporting both 802.3af and 802.3at standards with flexible management and high-speed connectivity.

### Key Features

#### Port Configuration and PoE Power

- The Huawei S200-8P4S switch offers 8 ports total, with 4 ports capable of 802.3at PoE+ and a total PoE budget of 124 W, ensuring full power delivery to connected devices like IP cameras, access points, or VoIP phones .
- PoE standards supported include 802.3af (15.4 W per port) and 802.3at (30 W per port), allowing compatibility with a wide range of network devices . Performance and Connectivity
- These switches provide Gigabit Ethernet speeds on all ports, ensuring high-speed data transfer for connected devices .
- Uplink options typically include SFP or SFP+ ports, enabling high-bandwidth connections to aggregation or core switches . Management and Reliability
- Huawei 4-Port PoE switches support SNMP, Web CLI, and CLI for configuration and monitoring, making them suitable for both small networks and enterprise campus deployments .
- Built-in fans provide forced air cooling, and the devices meet desktop-class noise requirements under normal operation . Use Cases
- Ideal for small office networks, IoT corridors, and Wi-Fi access points, where both data and power need to be delivered over a single Ethernet cable ....
