

Huawei Fiber Optic Router 6

Article Overview

Huawei 6 Fiber Optic Routers combine GPON and Wi-Fi 6 technologies to deliver high-speed, stable, and wide-coverage home or office networks.

Overview

Huawei's Fiber-to-the-Room (FTTR) solution extends fiber connectivity directly to individual rooms, ensuring a stable gigabit Wi-Fi experience throughout the home or office . These routers integrate GPON (Gigabit Passive Optical Network) technology with Wi-Fi 6, providing ultra-broadband access, high performance, and wide coverage . The solution addresses the “last-meter” coverage problem, allowing multiple devices to connect simultaneously without compromising speed or latency .

Key Features

- **Wi-Fi 6 Support:** Offers higher bandwidth, lower latency, and better performance for multiple devices, ideal for streaming, online education, and home office use .
- **GPON Integration:** Enables ultra-fast fiber-optic broadband access directly to the router, supporting future bandwidth upgrades .
- **Master/Slave FTTR Units:** Huawei FTTR systems include master and slave units to extend Wi-Fi coverage to every room .
- **Intelligent Management:** The NCE platform and LinkHome app allow real-time monitoring of network status, parental controls, and device management .
- **High-Performance Hardware:** Features like 2×2 MIMO, 1024QAM, and 160 MHz frequency bandwidth ensure robust data throughput and reliable connectivity .
- **Advanced Network Functions:** Includes smart Wi-Fi coverage, scheduled Wi-Fi shu...
