

Indonesian Fiber Optic Splice Box

Article Overview

Fiber optic splice boxes in Indonesia are designed for secure splicing, distribution, and protection of optical fibers, suitable for both indoor and outdoor applications.

Overview

A fiber optic splice box (also called a splice distributor) is a housing where fiber optic cables begin or terminate. It contains a splice cassette to hold fibers and reserves, and a front panel with connectors for transmitting signals via fiber or copper cables. Modern splice cassettes include trays, holders, couplings, and pigtails, simplifying installation and maintenance. Hybrid splice boxes can also provide power alongside data transmission, useful for hard-to-access locations .

Types and Features in Indonesia

- FTTH Fibre Distribution Boxes
- Designed for splicing, distribution, and protection of optical fibers.
- Suitable for wall-mounted or pole-mounted outdoor applications.
- IP65 waterproof rating ensures protection against dust and water .
- Optical Splitter Distribution Boxes
- Example: YINGDA 1x8 Optical Splitter Box with independent partitions for splitting and cable distribution.
- Features dust-proof SC adapters with shutters, rubber-sealed cable ports, grounding devices, and stainless steel clamps for outdoor durability.
- Supports mini SC adapters and flat drop cables, with low insertion loss ($IL \leq 0.35$ dB) for efficient signal transmission
