

Indoor waterproof and moisture-proof electrical distribution box

Article Overview

Indoor electrical distribution boxes are typically rated IP20-IP54 or NEMA 1-12, depending on dust and moisture protection requirements, with proper gaskets and sealing ensuring compliance.

IP Ratings for Indoor Enclosures

IP (Ingress Protection) ratings are defined by IEC 60529 and indicate the level of protection an enclosure provides against solids and liquids. The first digit (0-6) measures protection against solid objects like dust, while the second digit (0-9) measures protection against water ingress. For indoor electrical distribution boxes:

- IP20: Protected against solid objects >12 mm; no water protection. Suitable for dry indoor environments.
- IP30-IP44: Offers limited protection against dust and splashing water. IP44 is common for indoor areas with occasional moisture exposure, such as kitchens or utility rooms.
- IP54: Dust-protected and protected against water splashes from any direction, ideal for industrial indoor environments with higher humidity or occasional cleaning.

NEMA Ratings for Indoor Enclosures

In the United States, NEMA ratings are widely used for indoor electrical panels :...
