

Installation of Distribution Box System Dimensions

Article Overview

Distribution boxes are typically installed at 1.5–2.2 meters height with sufficient clearance around the box, and dimensions vary by type and application.

Recommended Installation Height and Clearance

For residential installations, the ideal mounting height is around 1.5 meters from the floor, making it accessible while keeping it out of reach of children . In industrial or commercial settings, the height can be adjusted up to 2.2 meters, depending on equipment layout and accessibility requirements . Ensure adequate clearance around the box for ventilation, maintenance, and future upgrades, typically 30 inches wide and 36 inches deep for working space compliance with NEC Section 110.26 .

Box Dimensions by Type

- Residential boxes: Compact, often single-gang or double-gang, designed for lighting, outlets, and small appliances . Typical dimensions range from 200–400 mm width, 150–300 mm height, and 80–150 mm depth depending on the number of circuits.
- Commercial boxes: Larger, multi-circuit enclosures for offices or retail spaces, often wall-mounted with multi-gang configurations to accommodate multiple breakers .
- Industrial boxes: High-capacity, durable enclosures for factories or workshops, often with IP44–IP67 ratings for dust and water protection. Dimensions vary widely, with some wall-mounted units exceeding 600 mm width and 400 mm height to house m...
