

Intelligent Adjustment System for Distribution Cabinets

Overview

You can now use AI to adjust your Smart Power Distribution Unit in real time inside telecom cabinets. AI predicts power demand and helps you avoid unexpected failures. Predictive load analysis gives you a clear view of your network's needs and lets you act before problems. Overview: PLS-DP series of intelligent precision power distribution Cabinet series products include: power, UPS input, output, counter, three varieties of Cabinet. Traditional systems measure them separately—creating inaccurate data. Shanghai Jiading 201801 Abstract: The intelligent control device can be used for 3~35kV indoor high-voltage switch cabinets, suitable for various switch cabinets such as central cabinets, handcart. Choose the most suitable pre-designed switchgear solution to save time and maximize reliability Electrical distribution digitalization is aimed to answer rising demand for energy efficiency and continuity of service for electrical installation.
