

Lighting distribution box model number

Article Overview

63A 380V Lighting Distribution Box (OEM Electrical Power Panel)

The lighting distribution box you are referring to is typically an OEM 63A 380V electrical power panel designed for subdividing electrical power into multiple circuits while providing protection via circuit breakers, fuses, or residual-current devices (RCD/RCBO) for each circuit . These boxes are commonly used in industrial, commercial, and event applications where reliable lighting control is required.

Key Features

- Current Rating: 63A
- Voltage Rating: 380V
- Circuit Protection: Supports 4, 6, 9, 13, 16, 20, or 24 ways for circuit breakers
- Components: Main switch, optional RCDs or RCBOs, circuit breakers, terminals
- Mounting Type: Can be surface-mounted or flush-mounted depending on the model
- Applications: Industrial sites, event setups, film and media lighting, domestic or commercial lighting distribution

Model Identification

While the exact model number may vary depending on the manufacturer or OEM, the product is generally referred to as a 63A 380V Lighting Distribution Box. Some manufacturers may assign additional series or reference numbers for internal cataloging, but the key identifiers are:...
