

Manufacturer s Active Optical Module SFP

Article Overview

Active Optical SFP modules are produced by specialized manufacturers worldwide, including BlueOptics, CZT, SANway, and others, offering high-speed fiber connectivity for data centers and telecom networks.

Overview of Active Optical SFP Modules

Active Optical Modules (AOCs) in SFP form factor are transceivers that convert electrical signals into optical signals for high-speed data transmission. They are widely used in data centers, enterprise networks, and telecom environments to extend transmission distances beyond copper limitations while maintaining signal integrity. These modules support various standards such as Gigabit Ethernet, SONET, and Fibre Channel, and are available in multiple types including SFP, SFP+, SFP28, QSFP+, and QSFP28 depending on speed and application requirements .

Leading Manufacturers

- BlueOptics: Offers SFP, SFP28, and QSFP28 modules, including 100G QSFP28 AOCs, with support for single-mode and multi-mode fibers. They provide LC interfaces and focus on fast deployment in data centers and cloud environments .
- CZT: Specializes in precision SFP and SFP+ cage assemblies and fiber optic connectors (LC, SC, ST, MPO/MTP). Their modules are engineered for high-speed signal integrity and comply with MSA specifications, supporting 1G to 25G applications .
- SANway (Sanoc): Based in Taiwan, SANway manufactures a wide range of SFP, SFP+, SFP28, QSFP+, QSFP28 modules, emphasizing high-speed, low-power, and ec...
