

National Standard for Molded Cable Trays

Overview

In the United States, the NEC (NFPA 70) is the main standard. Article 392 covers cable trays. Fill ratio and grounding are key inspection points. It is the first joint effort of NEMA and CSA International to put in one place standards for metal trays per both NEMA and CSA methods. Information on maintenance and system modification is also. IEC 61537:2023 specifies requirements and tests for cable tray systems and cable ladder systems intended for the support and accommodation of cables and possibly other electrical equipment in electrical and/or communication systems installations. The Core Standards: Overview Key Insight: BS EN 61537 is technically identical to IEC 61537 but includes UK-specific guidance and deviations.
