

No router replacement after fiber optic upgrade

Overview

In this guide, we'll explain router compatibility, setup steps and whether upgrading your router is necessary to maximize fiber speeds. Fiber optic service usually connects to an Optical Network Terminal (ONT) at your home, and from there, the signal can be distributed using your existing wiring, such as coaxial or Ethernet cables. This guide clarifies whether a full rewire is necessary, what factors influence the decision, and what alternatives exist to ensure you get the most from your. When switching to fiber internet, many users wonder if they're able to use their own router instead of the one provided by their internet service provider (ISP). So for anyone who has upgraded to fiber: Did you buy a third-party modem without a wifi router?

Did your ISP let you turn off the wifi portion of the modem?

Are there any other considerations I'm missing with upgrading to fiber?

Archived post. She now has a modern Smart Hub 2 with a wifi disc to boost connectivity etc, and all that stuff is working fine.
