

Outdoor fiber optic cable splice price

Article Overview

Outdoor fiber optic cable splicing typically uses fusion splicing for permanent, low-loss connections, with costs ranging from \$50 to \$150 per splice depending on site conditions and fiber type.

Splicing Steps

1. Prepare the Cable

- Strip the outer jacket using a fiber optic jacket stripper to expose the aramid (Kevlar) strength members and fiber strands .
- Remove the strength members with specialized Kevlar cutters.
- Strip the buffer and acrylate coatings carefully to expose the bare fiber, avoiding damage .

2. Clean the Fiber

- Use lint-free wipes and isopropyl alcohol to remove dust, oils, and debris from the fiber surface .
- Cleaning before cleaving is critical to prevent high splice loss.

3. Cleave the Fiber

- Use a precision fiber cleaver to create a perpendicular, flat end-face (ideal angle
