

Outdoor fiber optic patch cord making equipment

Article Overview

Producing outdoor fiber optic patch cords requires specialized equipment for cable preparation, connector assembly, curing, polishing, and testing to ensure durability and high performance.

Cable Preparation Tools

- Fiber/Cable Strippers: Remove the outer jacket and buffer coatings of various sizes (0.9mm, 2.0mm, 3.0mm) to expose the fiber for termination .
- Kevlar Scissors: Cut the Kevlar strength members inside the cable without damaging the fiber .
- Automatic or Manual Cable Cutting Machines: Cut fiber cables to precise lengths; automatic machines are preferred for high-volume production .

Connector Assembly and Curing

- Epoxy Injection Tools or Syringes: Inject adhesive into connector ferrules for secure fiber bonding .
- Fiber Curing Oven: Cures epoxy inside connectors such as SC, LC, FC, MU, ST, and MPO/MTP to ensure strong adhesion .
- Flange Crimping Machines or Pneumatic Crimpers: Secure connectors to the cable and provide strain relief .
