

Overseas Warehouse Connector Box 2 Cores

Article Overview

A 2-core fiber optic connector box is a compact enclosure for splicing, terminating, and managing two fiber cores, suitable for FTTH, FTTB, and FTTX networks.

Overview

The 2-core connector box, also known as a fiber termination or distribution box, is designed to provide a secure and organized environment for fiber optic connections. It supports mechanical or fusion splicing, termination, and patch cord connections, making it ideal for residential, commercial, and small-scale network deployments .

Key Features

- **Connector Types:** Typically equipped with 2 SC ports, compatible with SC simplex or LC duplex adapters, and sometimes includes SC APC shuttered adapters for stable connections .
- **Capacity:** Supports up to 2 fiber cores, with some models allowing expansion to 4 cores when using LC configurations .
- **Construction:** Made from high-quality ABS plastic for indoor units or rugged materials for outdoor IP55-rated enclosures, providing protection against dust and water .
- **Cable Management:** Internal routing allows for slack management and proper fiber bend radius, with multiple cable entry points for flexible installation .
- **Applications:** Suitable for FTTH, FTTB, FTTH, and FTTX networks, connecting drop...
