

PLC Spectrum Splitter Low Loss and Performance Comparison

Overview

Complete guide to selecting the right PLC splitter for your FTTH or PON network. Covers PLC vs FBT, split ratios (1x4/1x8/1x16/1x32/1x64), package types, insertion loss, and selection tips. What Is a PLC Splitter?

Passive optical splitters distribute a single optical input into multiple outputs in FTTH, ODN, and PON deployments. The choice of split ratio—1x2, 1x4, 1x8, 1x16, 1x32, or 1x64—directly impacts optical power budget, network reach, subscriber density, and long-term expansion capability. This. Why PLC Splitters Matter in Modern FTTH Networks □□ In any FTTH network, the PLC splitter is not just a passive optical component — it is a capacity decision point.
