

Price of Fiber Optic Coupler Devices

Article Overview

Fiber optic coupler prices typically range from \$10 to over \$200 per unit, depending on type, mode, and specifications.

Price Range Overview

- Basic multimode couplers for short-range applications often cost \$10-\$50 per unit. These are suitable for data centers or local networks where high precision is less critical .
- Singlemode couplers for long-distance or high-bandwidth applications generally range from \$50-\$150, reflecting their lower insertion loss, higher stability, and precise coupling ratios .
- Specialty couplers, such as ultra-low ratio tap couplers, wavelength division multiplexing (WDM) couplers, or custom all-band devices, can exceed \$200 per unit, particularly when designed for industrial, aerospace, or laboratory applications .

Factors Affecting Price

- Fiber Type: Singlemode couplers are more expensive than multimode due to tighter tolerances and lower signal loss requirements .
- Coupling Ratio: Standard 50/50 splitters are cheaper, while asymmetric ratios (e.g., 90/10 or ultra-low tap ratios) increase cost due to precision manufacturing .
- Wavelength Range: Couplers covering broader wavelength bands or specialized wavelengths (e.g., 1260-1620 nm) are priced higher .
- Connector Type: LC, SC, MTP, and E2000 connectors influence cost, with MTP and E2000 typically being more expensive due to complexity .
- Custom Designs: Custom or high-performance couplers for specific applications, s...
