

Price of Mesh Cable Tray Elbows

Article Overview

The installation price of mesh cable tray elbows typically ranges from \$15 to \$50 per elbow, depending on material, size, and installation complexity.

Material and Cost Factors

Mesh cable tray elbows are commonly made from galvanized steel, aluminum, or fiberglass, each affecting the price and installation effort. Steel elbows are durable and cost-effective for general use, aluminum is lightweight and corrosion-resistant, and fiberglass offers electrical insulation and high corrosion resistance. The choice of material influences both the unit cost and the labor required for installation.

Typical Price Range

- Galvanized steel mesh elbows: \$15-\$30 per elbow
 - Aluminum mesh elbows: \$20-\$40 per elbow
 - Fiberglass (FRP) mesh elbows: \$25-\$50 per elbow
- These prices reflect the purchase cost; installation labor may add \$10-\$25 per elbow, depending on site conditions and complexity. Labor costs are generally lower for mesh trays because they are lightweight, easy to handle, and require fewer supports and fittings compared to ladder or solid-bottom trays.

Installation Considerations

- Ease of bending and routing: Mesh trays allow quick adjustments, reducing labor time
