

Price of laying mesh cable trays

Article Overview

Wire mesh cable trays typically range from \$10 to \$50 per foot depending on material, size, and supplier.

Pricing Overview

Wire mesh cable trays, also known as basket trays, are among the most affordable cable management systems due to their lightweight steel construction and ease of installation . Prices vary based on material (stainless steel, galvanized steel, aluminum), dimensions, and supplier:

- Alibaba listings show custom 304 stainless steel wire mesh trays starting around \$10-\$30 per foot, depending on size and finish .
- Grainger offers a wide range of wire mesh trays suitable for data and communication cables, with prices typically in the \$15-\$50 per foot range, depending on length, width, and accessories .
- McMaster-Carr provides corrosion-resistant wire mesh trays with flexible configurations, generally priced similarly to Grainger, with options for same-day delivery .

Cost Advantages

Mesh cable trays are cheaper and faster to install than traditional metal conduit systems. They allow easy cable placement and ventilation, reducing labor costs and project time. Large projects can save 40-60% of the total budget compared to using conduit
