

Price of optical cable network frame for important cross sections

Article Overview

Optical Distribution Frames (ODFs) typically range from \$50 to \$1,500 depending on type, core count, and installation environment.

Price Ranges by Type

- **Outdoor Plant (OSP) Fiber Terminal Frames:** Designed for external installations with weatherproof enclosures, corrosion-resistant materials, and IP-rated protection. Price Range: \$400 – \$1,500. Ideal for telecom service providers, campus networks, and long-haul fiber installations .
- **Wall-Mounted Indoor Frames:** Compact and space-efficient, suitable for small offices, branch locations, or residential fiber terminals. Price Range: \$100 – \$400 .
- **Patch Panels:** Centralized points for connecting and cross-connecting fiber cables, supporting LC, SC, or ST connectors. Price Range: \$100 – \$800, commonly used in data centers, LANs, and fiber-to-the-desk setups .
- **Splice Trays:** Protect and organize fiber splices inside enclosures or ODFs. Price Range: \$50 – \$300, used in FTTH networks and repair/maintenance work .

High-Density Rack-Mounted ODFs

For larger networks or high-density applications, rack-mounted ODFs are available in 24, 36, 48, 72, 96, or more cores. These frames include shells, support frames, fiber trays, and protection devices for connectors. Prices vary based on core count and modularity, with higher-density frames costing more due to additional components...
