

Price of wiring at the beginning and end of the distribution box

Article Overview

Wiring a distribution box typically costs between \$3 and \$12 per foot installed, with additional labor for connections at the panel ranging from \$60 to \$125 per hour depending on complexity and region.

Wiring Costs

The per-foot cost of electrical wiring includes both materials and professional installation. For standard residential wiring, expect \$3 to \$12 per foot, depending on wire type (NM-B, THHN/THWN, UF-B), accessibility, and local copper prices . This cost covers the wire itself, labor to run it, and any necessary conduit or fittings.

Panel Connection Costs

Connecting wires at the beginning (main feed) and end (branch circuits) of the distribution box involves additional labor. Electricians typically charge \$60 to \$125 per hour for panel work, with a single-gang box connection taking 1-2 hours and more complex multi-gang or feed-through boxes taking 3-5 hours . Labor costs can increase if the panel is in a hard-to-access location, requires conduit bending, or involves high-amp circuits.
