

Regulations on the Use of Secondary Distribution Boxes in Benin

Article Overview

The use of secondary distribution boxes in Benin is regulated through national standards, safety requirements, and permits overseen by relevant agencies such as ANM and ANRT, ensuring compliance with technical, operational, and safety norms.

Regulatory Framework

In Benin, the installation and operation of secondary distribution boxes—whether for electricity, telecommunications, or other utilities—fall under a combination of national standards, safety regulations, and permitting requirements. The National Agency for Standards and Quality (ANM) is responsible for establishing and enforcing standards for goods and services, including electrical and telecommunication equipment, ensuring that all installations meet safety and quality norms (ANM) . For telecommunications-related distribution boxes, the National Agency for Telecommunications Regulation (ANRT) oversees compliance with sector-specific technical and operational standards .

Permitting and Compliance

Before installing secondary distribution boxes, operators must obtain the appropriate permits from the relevant governmental authority, which may include local municipal offices or sector-specific regulators. The permitting process typically requires submission of detailed operational plans, adherence to zoning laws, and compliance with structural and safety standards, such as fire protection, accessibility for mainte...
