

Router shows red light when there is no fiber optic signal

Overview

LOS (Loss of Signal) red light can be worrying because it usually means your internet connection has stopped working. However, in many cases, the issue is caused by something simple, such as a loose Fiber cable, a temporary network interruption, or an ONT that needs to be. The LOS light on your router indicates the status of your internet connection to the Internet Service Provider (ISP). When it's green and steady, everything is fine. In many cases, the issue is temporary and can be fixed with a few basic checks before you call support. Power cycle the device by unplugging it for 30. Whether your modem is blinking orange, your router has a solid red light, or you are staring at a mysterious "DS" indicator, you will find the answer below. Blinking green typically means data. Understanding LED Indicators on a Fiber Router Let's break down what the common LED lights on a fiber router mean and how they behave: 1. POWER Normal: Solid/stagnant light.
