

Sierra Leone Span Bridge

Article Overview

Sierra Leone is advancing major long-span bridge projects, including the 231-meter Mabang Bridge, to enhance connectivity, safety, and economic growth.

Key Bridges and Projects

Mabang Bridge (PC Ella Koblo Gulama Bridge) The Mabang Bridge, spanning 231 meters across the Ribbi River, features a steel structure with a concrete deck, two abutments, and two central pillars, powered by solar electricity. It was commissioned to replace a former ferry crossing, improving safety and facilitating the movement of goods and people between the Northwestern and Southern regions of Sierra Leone. The bridge is part of a broader initiative to transform six former ferry crossings into bridges, funded with support from the European Union and the Sierra Leonean government . Other Notable Bridges

- Gbangbama Bridge: 36-meter span
 - Moyamba Bridge: 42-meter span
 - Magbele Bridge: 163-meter length
- These bridges are part of the Moyamba-Moyamba Junction Roads and Bridges project, funded under the 11th European Development Fund, aimed at improving regional connectivity and reducing travel risks . SL-CAMIP Climate-Resilient Bridges Under the Sierra Leone Connectivity and Agricultural Market Infrastructure Project (SL-CAMIP), the government plans to construct four climate-resilient long-span bridges in Moyamba, Tonkolili, Bo, and Karene districts. These bridges will replace ferry and boat crossings at Kabba, Komrabai, Moselolo, and Sumbuya, enhancing access to agricultural markets, promoting regional integration, and reducing travel time and risks, particularly duri...
