

Singapore Hot-Dip Galvanized Cable Tray Price Inquiry

Article Overview

Hot-dip galvanized cable tray prices in Singapore vary widely depending on size, duty rating, and supplier, typically requiring direct quotes for accurate pricing.

Overview of Hot-Dip Galvanized Cable Trays in Singapore

Hot-dip galvanized (HDG) cable trays are widely used in industrial and commercial settings for durable and corrosion-resistant cable management. They are available in various duty ratings:

- Light Duty: 13mm thickness, suitable for small cable bundles
 - Medium Duty: 25mm thickness, for moderate cable loads
 - Heavy Duty: 50mm, 75mm, 100mm and above, for large or industrial cable installations
- HDG trays are typically made from hot-rolled steel coated with zinc, providing long-term protection against rust and environmental exposure. They comply with international standards such as IEC 61537 and local Singapore standards like SS249.

Factors Affecting Price

- Tray Size and Width: Wider and deeper trays cost more due to higher material usage.
- Duty Rating: Heavy-duty trays are more expensive than light or medium-duty trays.
- Material and Coating: HDG is generally more costly than pre-galvanized or epoxy-coated steel due to the hot-dip process
