

Singapore QSFP Optical Module

Article Overview

Singapore-certified QSFP optical modules are available in various types, including QSFP+, QSFP28, and QSFP-DD, supporting data rates from 40G to 100G with full compliance to international standards.

Overview of QSFP Modules

QSFP (Quad Small Form-factor Pluggable) modules are high-speed optical transceivers used in data centers and enterprise networks. They come in multiple variants:

- QSFP+: Supports 40G Ethernet, typically over single-mode or multimode fiber, with distances up to 10 km for single-mode applications (e.g., 40GBASE-LR4) and shorter distances for multimode fiber .
- QSFP28: Supports 100G Ethernet, including 100GBASE-SR4 for short-range multimode fiber and 100GBASE-LR4 for long-range single-mode fiber .
- QSFP-DD: Supports 200G-400G Ethernet, designed for next-generation high-bandwidth networks. These modules are hot-swappable and often include digital diagnostics monitoring (DDM) via I2C interfaces, allowing real-time monitoring of temperature, voltage, and optical power .

Certifications and Compliance

Singapore-certified QSFP modules typically meet international safety and quality standards, including:...
