

Suspended Platform Control Distribution Box

Article Overview

A suspended platform control distribution box is the core electrical system that manages power, safety, and operational control for suspended platforms, ensuring stable lifting and high-altitude work safety.

Core Functions

The control box serves as the central hub for suspended platform operation, integrating multiple control elements and safety devices. Key functions include:

- **Control Elements:** Start button, universal steering switch for lifting direction and speed, power indicator lights, and emergency stop button for immediate power cut-off in emergencies .
- **Safety Protection Devices:** Safety locks that engage during excessive descent or tilt, limit switches to prevent over-travel, overload protection, phase loss protection, and leakage protection to prevent accidents .
- **Power Distribution:** Ensures stable electrical supply to hoists and motors, supporting smooth lifting and lowering operations .

Specifications

Suspended platform control boxes are designed for various ZLP series models (ZLP250, ZLP500, ZLP630, ZLP800, ZLP1000) and can accommodate different motor powers (1.5 kW to 2×2.2 kW) and voltage supplies (220V, 380V, 415V) with single o...
